OOCL (USA), Inc. Provides Free Identity Protection to Employees Secures Leading Protection From Identity Fraud, Inc.

San Ramon, CA – Orient Overseas Container Line (USA), a leading employer in the San Francisco / Bay Area with nearly 1,000 employees located in the US and Canada, has secured a timely new identity theft benefit for its employees and their families from the industry pioneer, Identity Fraud, Inc. (IFI). As individuals become victimized, employees and employers suffer with lost time, productivity, and resources. IFI is providing education, VRS Elite™ Unlimited fraud resolution services, \$25,000 of broad identity insurance per person, and additional plan benefits, to OOCL employees and each of their family members to increase protection and reduce the burdens created by identity theft.

“Protecting our employees and their families with IFI's protection was a simple decision. Identity and data thefts are growing problems that can impact employee productivity. That's why we proactively selected IFI's services, as they offer our employees best-in-class solutions allowing our employees to continue to focus their attention on OOCL business", states Marsha Mutsumi-Thrall, Vice President of Human Resources for OOCL (USA), Inc.

Indeed, with identity theft being the fastest growing crime in America, where an estimated 9.3 million people were victimized in 2004, the havoc of identity theft is spreading to affect employers as well as their individual employees. The Identity Theft Resource Center, based in San Diego, estimates that victims spend 600 hours, on average, attempting to clear their identities from identity theft. Many of those hours are naturally consumed during work hours, which directly impacts organizational productivity.

“OOCL is one of our leading clients and is on the cutting edge of understanding that employee victims of identity theft need care and protection, just like health, dental, and other benefits. IFI provides broad coverage and their group programs are priced to make adding protection as an employee benefit an easy decision. We’re encouraging all of our clients to secure protection”, states Mark Karpenko, senior vice president for Jenkins/Athens Insurance Services and OOCL’s insurance advisor.

Through no fault of their own, individuals are having their data exposed to thieves on an unprecedented scale, with over 50 million records being lost or stolen in 2005. Indeed, with the rash of large-scale data thefts in 2005, individuals remain exposed to identity theft even when they undertake good protection practices.

“We’re very pleased to be supplying our Family Protection Plan to OOCL and we commend OOCL for looking after their employees and for recognizing its own exposures to identity crimes”, states Tom Widman, president of Identity Fraud, Inc.
